DIRECTIONS

1. Imagine the life of your dreams, picture 2 things for each category and write them in any two blanks for that box.

2. Repeat step 1, but with things from the life of your nightmares, filling in the rest of the blanks.

3. Draw a spiral starting at the dot:

count how many times it crosses the dotted line; this is your magic number.

4. Starting at the M in MASH, count each letter, and then each choice in the boxes. When you hit the magic number, cross out the choice you're on, and restart counting at the next choice.

5. Repeat step 4, skipping over choices that have already been marked out or circled (circle a choice if it is the only one that hasn't been marked out in its category).

6. Continue until every option is either circled or crossed out.

7. See how MASH sees your life in the future!
